The T4S Customer Satisfaction Survey V2.1 mergeable application (mApp) provides functionality that allows you to use Survey features such as various question and answer types, Automation Processes, One-Steps, Expressions, Search Groups, Widgets, and a Dashboard. This mApp allows Users to create interactive Customer Surveys. The T4S Customer Satisfaction Survey integrates with Cherwell Service Management (CSM) so that you can incorporate the surveys into your system.

**How the mApp Works**

T4S provides the Customer Satisfaction Survey V2.1 as a mApp so that Users can easily unify all aspects of the Survey Template process with their existing CSM system. After the mApp is applied, a new Survey Template major object is available in the system. Users can use the Survey Template in the same way as other CSM processes. Access the Survey Template Form by clicking File>New>New Survey Template in the CSM Desktop Client, or configure the Survey Template Business Object by clicking Create New Blueprint>SurveyTemplate>Edit Business Object in CSM Administrator.

Once the mApp is applied, users can create a new default Survey Template to add questions using several options including multiple choice, true/false, short answer, rating scales with numbers or stars, etc. Choose whether to apply a score to the answers and whether to make each question required. Once the mApp is published, links to the portal survey will be emailed to each requestor after the incident or service request is closed as long as they have not completed a survey in the last 3 months.

Administrators can customize all aspects of the survey to suit the business needs.
Customer Satisfaction Survey mApp

Customer Satisfaction Survey

1/4

Question 1

How satisfied are you with our ability to solve the issue.

Response

- Very satisfied
- Somewhat satisfied
- Neutral
- Dissatisfied
- Very dissatisfied

Steps to apply and use the mApp

1. Download the mApp from the mApp Exchange.
2. Apply the mApp using the Apply mApp wizard in CSM Administrator
3. Open the CSM Desktop Client. Create a new default Survey Template, add questions and add a Completion Action.
4. Publish the survey
5. Make the survey the default.
6. Create an incident, resolve and close it.
7. An email will be sent with a link to the portal.
8. When the email is received, the requestor can click the link, login and take the survey.
